P34WB3-PH

SS34WB02

P12PB2

The galvanized and phosphate buckles are made for ½-inch up to 1 ¼-inch-wide strapping.
The plastic buckles are for ½-inch or 5/8-inch-wide strapping.
The knurled buckles are made for ½-inch up to ¾-inch-wide strapping.

Galvanized wire buckles have a smooth, sometimes silver coating and are ideally paired with polypropylene, composite, or bonded cord strap.

Phosphate wire buckles have a gritty texture and are typically paired with woven cord strap.

Plastic buckles are only used with polypropylene strap.

Stainless Steel buckles are used with stainless steel strapping.
